

Paris, december 13th 2016,

Dear members of SumOfUs,

I'd like to thank you very much for helping our NGOs fight the re-authorization process of glyphosate in the EU. Your hundreds of thousands of signatures of the petition showed the strength of the opposition of people to this carcinogenous chemical and gave a real momentum to the anti glyphosate movement.

As a result, the European Commission had to give up giving the full green light to the chemical and had to postpone its decision for 18 months, until the ECHA european agency for chemicals gives a new evaluation of glyphosate. This is a victory that wouldn't have been possible without your participation.

Also your donations helped us file a complaint in France for Endangerment of others and aggravated deception on the dossier of the evaluation of Glyphosate. The complaint led to the opening of a preliminary investigation by the Tribunal of Lyon last august.

Many thanks again to you all who made this possible !

François VEILLERETTE, Director of Générations Futures
